WORK EXPERIENCE

Nanovest

Jakarta, Indonesia

Backend Developer (Java Spring Boot)

May 12th, 2023 - Present

- **2023 - 2024:** Focused on the account service domain, handling authentication, authorization, KYC, fraud detection, risk management, and forgery detection.
- **2025 - Present:** Transitioned to the asset team, managing stock and gold transactions, including trade processing, portfolio management, and transaction security.
- **Projects:** KYC one-to-many face search, reset 2FA and change phone number without login, encrypt customer PII data, migrating data from GCP Datastore to PostgreSQL.

Sinarماس Mining

Jakarta, Indonesia

Backend Developer OJT (Golang)

Nov 12th, 2022 - May 11th, 2023

- Carried forward the Alerta project from the IT Development program, migrating it from a GCP Compute Engine to a Kubernetes Engine and enhancing it with features such as alert notifications, on-call scheduling, escalation policies, and integrations with Slack and Jira.

Sinarماس Mining

Jakarta, Indonesia

IT Development Program Trainee (Golang, React JS & Native)

May 12th, 2022 - Nov 11th, 2022

- Completed a comprehensive bootcamp covering IT fundamentals, networking, and programming languages including Golang, JavaScript, and React.
- Successfully developed 'Alerta', an incident management application as the final project in collaboration with my team.

EDUCATION

Universitas Gadjah Mada

Yogyakarta, Indonesia

Bachelor of Engineering in Engineering Physics

October 22nd, 2021

- **GPA:** 3.63 / 4.0
- **Final Project:** Implementation of Random Forest Method for Stiction Detection in Control Valve
